

Vintage Motorcycle Clarification Information – 1/24/2012

The intent of this bulletin is to clarify rules for the Vintage motorcycle division for the 90th Running of the Pikes Peak International Hill Climb. There is a conflict between the Pikes Peak International Hill Climb rule book and page 75 paragraph “A” that states the following: Vintage Class - 650cc-750cc 4-stroke twin cylinder that would qualify for current AHRMA events. In keeping with the historic aspects of this class of motorcycle racing, the minimum age limit for a rider is 50 years of age.

The AHRMA rulebook restricts many components on a vintage motorcycle being raced in an AHRMA event to components from the period when the motorcycle was manufactured.

For the 2012 event motorcycles in the vintage division will be allowed to upgrade components directly related to safety. The components that can be upgraded to non “period” components are tires, wheels and brakes. All other components will need to be a vintage component. No carbon fiber or other modern material will be allowed.
